

# Recycling is State Mandated

## Are You in Compliance?

For many years, the waste collected from your business or multi-family complex has been taken to a mixed-waste processing facility where it is sorted through, and recyclable materials are removed and recovered for recycling. This old technology was effective in the early implementation of recycling programs statewide however does not produce sustainable recycling diversion to meet the current state standards.

PARK Waste & Recycling will be providing commingled source-separated recycling where all recyclable materials are mixed together and separated from trash. Businesses and multi-family dwellings will automatically subscribe to a minimum recycling service level of a 96-gallon recycling cart serviced once per week. This service is a minimum basic level, and most users may find a higher level of service that meets their needs.

Those subject to the law:

- Businesses, nonprofits, strip malls, government offices, and schools.
- Multifamily complexes with 5 units or more.
